Personal Statement

I am passionate about understanding the role social connections and interactions play in health behaviors. This passion has manifested itself through a research focus on social network analysis and health behavior. More specifically, I have focused my research on the social aspects of physical activity among children and families. Because of this focus, I have had the opportunity to get research experience in social network analysis, systematic observation, intervention development and implementation, as well as rural and minority health.

Research Support

2019

Speeding Research-tested INTERventions (SPRINT): Play Streets for All

Role: Entrepreneurial Lead (EL)

Funding Source: National Cancer Institutes and Centers for Disease Control

Funding: \$21,750

Description: SPRINT is a training and fellowship to help researchers strengthen interventions and improve dissemination and reach of their research. This program was used to improve the Play Streets for All intervention and dissemination to help promote physical activity and play for all ages in low resource areas.

Modeling Physical Activity and Friendship in Summer Care Programs

Role: Co-PI

Funding Source: Baylor University Research Committee Grant Program

Funding: \$4,375

Description: Using Social Network Analysis we aim to model the effects of a summer care program on children friendships and physical activity. Multiple networks will be assessed across three diverse community Boys & Girls Clubs.
